COURSE CODE : 7TT

DURATION : 1 Day

Organizations and individuals are finding the traditional ways of thinking increasingly inadequate to address many of the issues they are facing today. Creativity, innovation, and the ability to implement new ideas has become a survival skill in this era of information and change. Yet unlike traditional thinking, where one can follow a structured process to reach a solution, innovative thinking by definition is often unstructured and is therefore difficult to model. Nevertheless, the fundamental principles of creativity have been well researched, and a number of useful tools and techniques conducive to innovative thinking have also been developed.

The purpose of this course is to provide participants with 7 thinking tools to help participants generate extraordinary ideas and turn these ideas into actions.
